

Tata Consultancy Achieves Comprehensive Data Protection with Forcepoint DLP

This global consulting service found itself unable to plug the security holes created by its prior data loss prevention solution. Forcepoint DLP provided a more secure and easy-to-use solution with comprehensive data protection.

Challenges

- Disparate DLP policies left holes in security posture.
- DLP policies were too complicated and took too much staff to maintain.
- Prior solution left exposure to data exfiltration.
- Not able to adequately control and manage regulated data.

Approach

- Deploy Forcepoint Data Loss Prevention (DLP) to safeguard data and provide best-in-class support for digital transformation.
 - Find and control sensitive data and intellectual property.
 - Set policies just once, from a single console.

Results

- Better visibility of data movement within the business and improved risk management.
- Reduced alerts and false positives while maintaining a strong security posture.
- Able to share data safely with partners and ensure regulatory compliance.
- Enabled management of personal devices.
- Able to start data loss prevention project 50-70% faster than expected, and reported seeing value from their investment within 3-6 months.
