

Forcepoint Keeps The Boeing Company Protected Without Downtime

The world's leading aerospace company doesn't have time for downtime. To keep business moving, it needed a next-generation firewall to protect the business without negatively impacting user performance.

Challenges

- Previous solution had inefficient one-to-many device provisioning.
- Needed policy consistency across firewalls.

Approach

- Forcepoint NGFW for the top-ranked security with implementation that didn't require an on-site technician.

Results

- Significant improvement of end-user internet performance.
- Planned maintenance and unplanned outages were reduced from weeks to days.
- Incident response time was reduced from weeks to days.

CUSTOMER PROFILE:

The Boeing Company is a multinational organization that designs, manufactures, and sells airplanes, satellites, communications gear, and more.

INDUSTRY:

Aerospace

HQ COUNTRY:

United States

PRODUCT:

Forcepoint Next Generation Firewall

"Fewer maintenance outages, and monitoring for vulnerabilities is a lot easier."

Anthony Moore,

IT Specialist, The Boeing Company
